* Earth ⊕ represents four points on the compass North, South, East, West. This is why the Cardinal points, the angles are so important in the chart.

* The elements are necessary for life to exist. Think of a tree planted in the **earth**, it needs **water**, and sunshine (**fire**) and **air** carbon dioxide converted into oxygen.

The Four Essential Dignities of the Planets

Rulership is just what the ancient text and astrologers called it, but it means this is where it is at home, its realm, it is stronger on its own turf. **Detriment** it is in the opposite sign or its ruler. Can feel misunderstood because it's in a foreign place.

Exaltation the planet operates easily with the energy of that sign. Fall it is weakened and has to get creative to find expression. This helps to determine the strength of a planet in the natal (birth) chart along with how well it is aspected.
